PAREXEL® INFORMATICS

Technology and data services to accelerate your drug development process
YOUR JOURNEY.
OUR MISSION.

From complexity to clarity, industry-leading, integrated platforms and applications
PAREXEL Informatics develops the technological innovations to make the process of drug development faster, more accurate, more productive and easier to track.

Our dedicated Informatics group creates industry-leading, integrated platforms and applications designed by clinical researchers to improve the way companies perform clinical trials, control and share data, track and report patient outcomes, and manage regulatory information.

Paired with PAREXEL’s 30+ years of in-depth clinical, regulatory, and commercialization expertise, our technology solutions leverage proven best practices to simplify the drug development process from beginning to end.

PAREXEL Informatics’ technologies will help you maximize the value of your product portfolio, assure the integrity of your data through the pipeline, and accelerate the progress of your journey.
PERCEPTIVE MYTRIALS®—SINGLE-POINT ACCESS TO CLINICAL DATA AND APPLICATIONS

Perceptive MyTrials is a versatile and comprehensive software-as-a-service (SaaS) platform that gives you single-point access to a suite of fully integrated applications, data, and information associated with clinical trials and programs. The Perceptive MyTrials Platform provides unified access to an eClinical suite of tools, each a proven leader in its own right, that can be used in combination or as stand-alone solutions to the key problems faced by clinical researchers today.

Perceptive MyTrials simplifies the drug development journey by providing a central point of management for:

- Electronic data capture, randomization, and trial supply management
- Regulatory information management
- Clinical trial management
- Medical imaging
- Electronic patient-reported outcomes

As an open platform, Perceptive MyTrials not only integrates seamlessly with other PAREXEL technologies, but also with third-party tools you may already be using.
100% of the Top 15 Pharma Companies are running PAREXEL technology.
END-TO-END TECHNOLOGY FOR EVERY PHASE

**DATALABS® EDC**  
STREAMLINE DATA COLLECTION, USE AND REPORTING  
PAREXEL’s DataLabs EDC is an Electronic Data Capture system designed to ease workflows and simplify the entire clinical trial process. The DataLabs EDC system not only collects and unifies clinical data from disparate paper and electronic sources (including third-party applications), but also helps you share and use the data with complementary applications, and provides reports to support clinical, regulatory and marketing activities.

**CLINPHONE® RTSM**  
IMPROVE RANDOMIZATION AND SUPPLY MANAGEMENT  
Our ClinPhone RTSM (Randomization and Trial Supply Management) system is the industry’s most trusted IVR/IWR system, to manage randomization and medication dispensing and inventories. The ClinPhone RTSM system helps you easily perform a comprehensive range of supplies administration and site management activities. With ClinPhone RTSM, you can also monitor real-time recruitment, manage emergency treatment code breaking, help ensure accurate dosing and manage early phase cohort studies.

**IMPACT® CTMS**  
SMARTER TRIALS MANAGEMENT AND MONITORING  
IMPACT CTMS is a leading clinical trials management system designed to help you manage the complexities of your trials more effectively. The IMPACT CTMS system provides fast, flexible global integration, an adaptive framework and exceptional functionality. Its product modules deliver comprehensive management of trial planning, country and site progress, monitoring activities, supplies and finance, with state-of-the-art investigator data mining and operational support.

**PAREXEL® ePRO SOLUTION**  
MORE THAN 2M ASSESSMENTS DELIVERED WORLDWIDE  
PAREXEL’s ePRO (electronic Patient-Reported Outcomes) technologies help you choose the most effective electronic patient-reported outcomes solution for your trial. Patient-reported outcomes are playing a growing role in assessing efficacy and quality of life, recruiting patients, measuring symptoms, providing safety information, and monitoring medical compliance. ePRO can simplify and facilitate using those patient reports more rapidly, accurately and for less cost. PAREXEL makes it easy for you to decide which ePRO method is optimal for your protocol, whether Interactive Voice Response (IVR), Interactive Web Response (IWR), PDA or Tablet.
MEDICAL IMAGING
THE RIGHT INFORMATION AT THE RIGHT TIME

PAREXEL Informatics is a global leader in deploying time- and budget-saving medical imaging tools in clinical trials across the entire project life cycle. Medical imaging can serve as a surrogate endpoint, letting you “see” the effect of a new drug much earlier than traditional endpoints, and can also offer effective support for “go/no-go” pipeline decisions. PAREXEL’s full range of services comprises all the necessary pieces for successful trial imaging implementation, including protocol/study design and charter development, site qualification, in-house image QC, independent image reading and analysis, data reconciliation and export, final archival, regulatory support, and submission.

LIQUENT® INSIGHT
WORLD’S LEADING REGULATORY INFORMATION MANAGEMENT PLATFORM

LIQUENT Insight is the only fully integrated, end-to-end Regulatory Information Management (RIM) solution available today. LIQUENT Insight accelerates the journey of your product by delivering powerful submission planning, publishing, viewing, and registration management. An open enterprise platform, LIQUENT centralizes your regulatory information to promote standardization, improve collaboration, ensure compliance, eliminate waste, reduce costs, accelerate product releases, and allow you to operate and compete more effectively everywhere.

PERCEPTIVE MYTRIALS®
CUSTOMER CARE SERVICES
TECHNICAL SUPPORT AND GLOBAL HELP DESK SERVICES 24/7/365

The Perceptive MyTrials Customer Care Services (CCS) group provides single point of contact technical support and global help desk services for all PAREXEL applications and a one-stop shop for all your clinical trial support needs including other clinical trial technologies, technology integrations, medical escalations, emergency unblinding and direct patient support.
