STEM OUTREACH

PAREXEL is actively involved in numerous conferences each year focused on increasing awareness of our industry and STEM positions available at our organization.

We know firsthand the importance of educating young people in the STEM areas (Science, Technology, Engineering and Mathematics). Our future success as an organization depends on a constant supply of highly trained, highly capable talent.

PAREXEL, with a global population of over 18,000 employees, including scientists, IT professionals, and mathematicians/statisticians is committed to working with educators, associations, and industry thought leaders to develop programs and opportunities for recent STEM college graduates.
